EDUCATION

- Completed BE Computer Science and Engineering in Pollachi

LANGUAGES

- ENGLISH
- TAMIL

LEARNING TOPICS

- Docker
- Terraform
- AWS
- Azure

PROFESSIONAL EXPERIENCE:

- Over two and a half years of experience as an Embedded Software Integrator [Devops Engineer].
- Skilled in the Automation CI/CD Process
- Demonstrated proficiency in Jenkins, Git, Bitbucket, and Jira, with experience in monitoring releases, conducting initial testing, optimizing workflows, and standardizing deployment processes.

WORK EXPERIENCE:

DevOps Engineer at Ancit, Client: Robert Bosch Global Software Technologies, Bangalore [April 2022 – July 2025]

- Involved in all stages of Software Delivery.
- Setup Multi branch Jenkins Pipeline for quality gates to improve the quality of the Codes.
- Managed workflows in Jenkins, handled end-to-end CI/CD process.
- Monitoring and introducing new Jenkins releases Pipeline to generate the SW Deliverables.
- Coordinating with Multiple developers and stakeholders to centralize changes and prepare deployment plan.

Manual Testing at UST, Client: Robert Bosch Global Software Technologies, Coimbatore [October 2025 - Present]

- Manual Mobile Application Testing with the Sensonic products and Sensors related to Glucose Monitoring

CORE TECHNICAL SKILLS:

- Continuous Integration: Jenkins
- Version control systems: Git, Bitbucket , Github
- Continuous Monitoring: Grafana Dashboard
- Scripting languages: Cmake ,YAML, C, C++, JAVA, MYSQL, Python
- Tools: Jira, Smart Git, CANAPE, VAST, CANOE [CAN, Ethernet], RQM

ACHIEVEMENTS:

- **Spot Award:** Recognized for exceptional performance, dedicated service, and steadfast dedication to the organization.

CERTIFICATION:

- I received my J2SE Programmer certification from Man Free Technologies.

PERSONAL STRENGTHS:

- Good communication skills
- Adaptability to new environments and ability to work under pressure
- Excellent analytical skills and problem-solving abilities

PROJECTS:

Renault Nissan Mitsubishi [RNM] & Fiat Chrysler Automobiles [FCA]:

- I worked as a Software Integrator for the Front Radar on both RNM and FCA projects. My main responsibility was to ensure the seamless integration of various components and systems. In this dynamic role, I collaborated with cross-functional teams, including software developers, hardware engineers, and testing teams.
- Customizing branch management to meet the unique needs of each Project.
- Creating and maintaining Jenkins pipelines to meet project-specific requirements.
- Monitoring release builds report generation
- Regularly monitor pull requests from developers, and if a build fails, debug the issue and share the error details with the developer.
- Supporting developer through build process.
- Involved in project planning.
- Successfully established and operationalized three Radar test bench setups in India.
- Implemented quality gate to block the PR from level 0 to level 7 warnings[QAC and Coverity Warning]
- Maintain the Jenkins machine and resolve pipeline and Jenkins node-related error.
- Delivering software packages and Plant container for the customer.
- Testing SW in both Open and Closed Bench
